Subject: Please Review: 2nd Draft Recommendations and Statement
Attachments: Recommendations on WQT_Second Draft_2014 03 04.docx; Draft Joint Statement - 2013 03 04.docx; Recommendations on WQT_Second Draft_2014 03 04_wCover.pdf

Hi everyone,

We have been working hard to incorporate your comments and refine the draft Recommendations on Water Quality Trading document (formerly Best Practices). Attached documents include:

1. A complete 2nd draft of Recommendations on WQT
2. A revised draft Statement
3. A pdf of the Recommendations doc, including cover page (for those interested in what the final product might look like)

We ask that you review and provide comments by April 4th. What else do we need to finalize this as our working version during the pilot phase?

In addition to many many revisions to address your comments (which we thank you again for providing!), below is a list of some of the key changes that we made from the last version to this one:

- Development of Executive Summary
- Separation of Statement from Recommendations document
- Reformat the Guiding Principles as prose
- Revise and condense Permitting section
- Rewrite of the Baseline section
- Split Quantification into sections dealing with edge-of-field estimates vs adjustments for attenuation, retirement, uncertainty, and other trading ratios
- Rewrite Credit Stacking section
- More clearly defined Project Life, Credit Life, Project Protection Period
- Revise and condense Compliance & Enforcement section

There are also a couple comments in the margins to indicate where changes were made or questions remain. Also, please note, we got through a first round of copy editing for capitalization of defined terms, fonts, spacing, and other fun formatting tasks, but we know that it needs one more round, "fine tooth comb"-style. We'll be working on that this month while you review the content.

Finally, If you would like to see the very marked up Track Changes version, or would like to see all the comments received, just let me know.

Best,
Carrie
